# ALDRICH PARAS

Chicago, IL | (630) 890-2006 | ajtparas@gmail.com | LinkedIn | GitHub

## PROFESSIONAL EXPERIENCE

**TxODDS** Chicago, IL / London, UK

*Data Quality Analyst, Team Lead* May 2026 – Present

- Led the **Scores-DQ** migration from request-time Python to Snowflake marts, retiring the API tier on schedule
- Own the Snowflake/dbt/Airflow pipeline behind Scores-DQ, building ~80 dbt models and 2 daily ESPN ingestion DAGs
- Built the team by designing its assessment, adding a project manager, full-time analyst, and part-time intern
- Delivered ~20 client-driven quality initiatives, cutting score adjustments by 63% and player-stat adjustments by 64%
- Co-develop a commercial play-by-play dataset for the Spartera marketplace, remodeling betting data into a consumer format and owning requirements gathering

*Data Quality Analyst* Jul 2025 – Apr 2026

- Took Scores-DQ to production as a governed product with 24 semantically versioned releases and a changelog
- Re-architected a monolith into a FastAPI backend and Shiny frontend deployed as independent Kubernetes services
- Automated validation of scout entries, latency SLAs, and ESPN reconciliation across up to ~500 fixtures weekly in peak season
- Scaled Scores-DQ to recheck 80% more fixtures season-over-season, adding $26.4K in measured savings over the prior season

*Sports Data Quality Assurance Specialist* Oct 2024 – Jul 2025

- Independently built the QA function as the first QA hire at the new Chicago branch, authoring its reporting templates and Confluence docs
- Built and deployed a self-initiated QA automation platform to production, cutting weekly recheck labor from 96 to 12 hours and saving an estimated $40K annually
- Secured adoption of the platform as an official TxODDS system through recurring demos to the CIO and CTO
- Migrated the ~15,600-line codebase from R to Python to align with company frameworks

*Live Data Analyst* Aug 2024 – Oct 2024

- Verified live scout-entered data against ESPN and StatBroadcast in real time, correcting production records mid-game

**Harris & Harris** Chicago, IL

*Data Analyst* Jan 2023 – Aug 2024

- Triaged 800+ automated overnight report files daily across a portfolio of 12–20 healthcare-receivables clients
- Surfaced delinquent accounts that recovered ~$35K in client receivables annually, holding a 96% account reconciliation rate

**BroadStreet Institute** Remote

*Community Data Intern, concurrent with Harris & Harris* Apr 2023 – Jun 2023

- Reconciled a community-health database against new hospital CHNAs for 16 assigned hospitals, resolving indicator definition drift and suppressed values

## EDUCATION

**Loyola University Chicago** Chicago, IL

*Bachelor of Science in Data Science* May 2022

Magna Cum Laude · Departmental Honors · Dean's List (all eligible semesters)

Capstone, City of Milwaukee Assessor's Office: property-comparables model over 122,096 residential records using R and scikit-learn

## TECHNICAL SKILLS

**Languages:** SQL, Python, R
**Data Platforms:** Snowflake, dbt, Apache Airflow (Astronomer), Airtable
**Infrastructure:** Docker, Kubernetes, ArgoCD, GitHub Actions, Git
**Application:** FastAPI, Shiny, pandas, scikit-learn
**Practices:** Medallion modeling, data validation frameworks, cross-source reconciliation, API and WebSocket integration
